Participants from partner and ally nations gather for a group photo at the Exercise Rim of the Pacific (RIMPAC) 2026 Initial Planning Conference in San Diego, June 23, 2025. An integral part of the U.S. Pacific Fleet, U.S. 3rd Fleet leads naval forces in the Indo-Pacific and provides the realistic, relevant training necessary to execute the U.S.

Navy's role across the full spectrum of military operations. U.S. 3rd Fleet works together with allies and partners to advance freedom of navigation, the rule of law, and other principles that underpin security for the Indo-Pacific region. *(U.S. Navy photo by Mass Communication Specialist 2nd Class Lordin Kelly)*

Shackleton ASW Aircraft Saved by Yorkshire Air Museum

Work to relocate a giant RAF submarine-hunting aircraft to the Yorkshire Air Museum has passed a major milestone, with all the sections of the aircraft now on site at Elvington. The Avro Shackleton – a cousin of the iconic Lancaster bomber – was used to track Soviet

submarines in UK waters, and to aid in search and rescue operations, from the 1950s to the early 1990s. Shackleton WR963 had been based at Coventry Airport and was kept in 'live running' condition by a team of volunteers, meaning it could run its four Griffon engines although it can no longer fly. It lost its home when the airport closed, and its future was uncertain until a deal was struck to move it to the Yorkshire Air Museum.
